

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

South; and varieties of soy beans and the oriental timber and edible bamboos of Japan, which are now represented by groves in various parts of the south, were also secured.

HONORARY DEGREES AT YALE UNIVERSITY

At the recent commencement of Yale University the degree of doctor of science was conferred on Dr. H. P. Armsby and the degree of master of arts on Dr. William Darrach, Professor H. E. Hawkes and Mr. E. W. Nelson. In conferring these degrees President Hadley said:

HENRY PRENTISS ARMSBY: A graduate of the Sheffield Scientific School in 1874, specializing in chemistry; doctor of philosophy at Yale, 1879; for several years he was associated with that admirable institution, the Connecticut Agricultural Experiment Station. He has been a teacher in various universities; he is a leading authority on animal nutrition at Pennsylvania State College. He is now director of the Institute of Animal Nutrition at Pennsylvania State College. After the signing of the armistice, he was chosen to go abroad in the commission concerned with food problems in Europe. His career has been a multitudinous blessing.

WILLIAM DARRACH: Was graduated from Yale College in 1897; member of Phi Beta Kappa; took the degree of M.A. and M.D. at Columbia; is now dean of the medical faculty at the College of Physicians and Surgeons. He was attached to Base Hospital No. 2, with commission as captain, and sailed for France in May, 1917; was advanced to the rank of colonel in 1919, and became senior consultant in surgery at headquarters. His publications in scientific research are important. He is a surgeon, a scholar, a teacher and a patriot.

HERBERT EDWIN HAWKES: B.A., Yale, 1896; Ph.D., 1900; like many of his classmates, Dr. Hawkes became a member of the Yale faculty, and taught mathematics for twelve years. In 1910 he was called to Columbia as professor; he was such a conspicuous success in administration that he was made dean of the college. He is the author of books in his chosen field, but his chief distinction is a worker of miracles—he has made hundreds of young men love mathematics. Perhaps they would not love mathematics so much if they did not love him even more. A living force in education.

EDWARD WILLIAM NELSON: A distinguished naturalist and one of the first ornithologists in the

world. He has been on scientific expeditions in the Arctic and Torrid Zones, and is at home everywhere. He was in Alaska in 1877, with the expedition in search of the *Jeanette* in 1881, and has spent many years of scientific conquest in Mexico. He has published authoritative monographs on the birds of Bering Sea and on the squirrels of Central America. He is chief of the Biological Survey in the U. S. Department of Agriculture. During the war, he was constantly employed, and he discovered the best method of ridding the trenches of undesirable visitors; thus making the study of natural history contributory to social science. He leaves for Alaska to-day.

The degree of doctor of laws was conferred on Sir Auckland Campbell Geddes, member of British Parliament, formerly professor of anatomy, British ambassador to the United States.

SCIENTIFIC NOTES AND NEWS

THE Albert medal of the Royal Society of Arts has been awarded to Dr. A. A. Michelson, professor of physics in the University of Chicago.

DR. EDGAR F. SMITH, retiring provost of the University of Pennsylvania, after conferring degrees and giving the commencement address, received from Dr. William Pepper, dean of the medical school, the doctorate of medicine, conferred at the special request of the faculty of the school of medicine.

HARVARD UNIVERSITY has conferred its doctorate of science on Dr. W. W. Keen, of Philadelphia, and Dr. H. M. Biggs, of New York.

THE doctorate of science has been conferred by Tufts College on Dr. Arthur B. Lamb, professor of chemistry at Harvard University.

THE degree of master of science was conferred on Major Edward Hall Bowie, forecaster, U. S. Weather Bureau, at the commencement of St. John's College.

THE semi-centennial celebration of Iowa State College was held in connection with commencement in June this year, having been delayed nearly two years on account of the war. Four hundred and thirty-five degrees were awarded. No honorary degrees had been given in recent years. Thirteen were conferred
